ATTY. AGUSTIN LABAN III
OIC, Schools Division Superintendent
Division of Baguio City

SIR:

Warmest greetings!

Many Filipino children now develop and reach adolescence and eventually adulthood. However, it is in this critical stage of adolescence that many health-related behaviors are adopted and certain health risks begin to threaten the individual.

The adolescent is a powerful stage of human development that ultimately plays a large influence on the formation of the future adult. It is a multi-faceted stage that involves major significant changes, including transformations in the physical, emotional, social and spiritual aspects of the individual.

Such changes make the adolescent and future adult more vulnerable to existing and emerging health hazards. Smoking, illicit drug use, mental health stability, irresponsible sexual practices, for example, make the adolescent susceptible to heart and lung disease, future addiction, depression, HIV-AIDS and teen pregnancies as well.

In view hereof, may we invite the class presidents in all sections in the third year level and club/organization representative existing in your school to attend the 2-day training/seminar on Adolescent Reproductive Health (ARH) which are scheduled on the following dates: First batch, December 11-12, 2012 and second batch December 13-14, 2012 at the Prince Plaza Hotel, Legarda Road, Baguio City. Together, we can help our youths understand about their reproductive health risks and its consequences thus developing their life skills for their over-all development.

Your positive response on this matter is highly appreciated.

Thank you and God Bless!

Very truly yours,

ZENAIDA P. QUIJANA, MPA
Population Program Officer IV
