Dear Dr. DONATO,

The Restoration Ecology Society of the Philippines – Saving the Cordillera Ecosystems Network (RESPHI-SCENE), a non-profit organization which was organized by professionals from the academe and other agencies to provide a venue for the exchange of ideas and knowledge on various disciplines, will be holding its 5th National Annual Conference on May 22-25, 2016 at the University of the Philippines Baguio, Governor Pack Road, Baguio City. This year's theme is *"Bridging Society, Education, and Environment in Response to Global Integration"*.

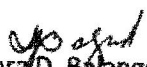

This conference will provide an opportunity for students, faculty and researchers to present or share their research results from their investigatory projects, researches, theses and special problems. The main objective of this year's annual conference is to foster camaraderie among its participants, provide a venue for the high schools students and teachers to have an opportunity to present in a national conference while sharing their research results and exchange ideas at the same time. They will also be updated with current trends in research, establish linkages with experts and open windows for mentoring. We also encourage participants to join a healthy competition of their research outputs by indicating their intent of competing on the abstracts to be submitted. As an incentive, the society will be providing modest cash prizes and certificate of recognition to the best presenters, both oral and poster for competing participants.

In connection to this, the society would like to seek endorsement from your office to enable the teachers, researchers and students from various high schools to join us during the conference.

Please see the attached brochure for details or please visit our fb account RESPhil Scene. We would appreciate it if your office can please help us disseminate the attached invitation/brochure to prospective participants.

Thank you and we look forward to your favorable endorsement.

Respectfully yours,

Teodora D. Blangcod, Ph.D.
RESPhil President 2015
