Sir/Madam:

We would like to invite you, your faculty and personnel to our CHED endorsed seminar, **NATIONAL CAPABILITY BUILDING ON EDUCATIONAL RESEARCH** with the theme **"Basics and Beyond: Research Approaches and Designs"** on **October 16-18, 2019** and on **November 20-22, 2019** at the **Hotel Supreme, Baguio City**.

The activity aims to:

1. Update participants on the status of research in the country.
2. Review participants on the research process and ethical considerations.
3. Explain the process of systematic review of literature to yield gaps or areas for research.
4. Explain the different approaches and designs of research.
5. Explain the process of action research.

The capability building seminar costs Php 6, 500 (inclusive of accommodation, meals, kit and certificates. Early bird rates (before September 30 for October schedule and October 30 for November schedule), group rates of 5 pax, and graduate school student rate cost Php 6, 300.

Attached are the rationale, topics and other details of the seminar. For inquiries and reservation of slots, please contact us thru 09397564615(Smart), 0955933936, equilbaguio@gmail.com or visit our facebook page.

We hope for your participation in this endeavor.

NATIONAL CAPABILITY BUILDING ON EDUCATIONAL RESEARCH

"Basics and Beyond: Research Approaches and Designs"

Rationale

Research is demanded more than ever in the academe. As Cooper, Levin and Campbell (2009) put it, one feature that distinguishes education change in the last decade from previous waves of reform has been a growing interest in the ways that research evidence is incorporated into policy and practice. Both the Department of Education and the Commission on Higher Education issued memorandum and orders outlining their respective research agenda and guidelines in the accomplishment of these goals. The teachers, as recipients, need to be knowledgeable and competent not only as researchers themselves for professional development but as facilitators in the teaching of research especially in the Senior High School. In addition, research results are needed as inputs for continuous improvement of the different aspects of delivering education. On the other hand, college and graduate school students still need to grasp the basics of formulating a problem of the study and matched to an appropriate research design.

With these challenges, several seminars and trainings have been conducted but only few delve on the over-all need of teachers, that is, oriented on all the possible research designs coupled with the awareness on the state of research in the country.

Thus, this National Capability Building on Educational Research aims to:

1. Update participants on the status of research in the country.
2. Review participants on the research process.
3. Explain the process of systematic review of literature to yield gaps or areas for research.
4. Explain the different approaches and designs of research.
5. Explain the process of action research.

EXPECTED OUTPUTS: At the end of the seminar, the participants should be able to:

1. Identify gaps from studies to form a research problem.
2. Determine the process of doing interventions the scientific way to improve student and teacher performance
3. Appraise different research designs for appropriate research methods and techniques.
